Nazwa

TransForm N 1-channel DVI Input Node
Medium bandwidth single channel full
framerate DVI encoder

Cena

0,00 zł

OPIS PRODUKTU

Barco's single-channel DVI Input Node is a standalone appliance, encoding and delivering the applied input signal across Ethernet, for decoding and displaying on one or multiple H.264 compatible output nodes.

Features and benefits

Full 24bits processing, YUV4:2:0 color sampling

Full 60 Hz frame rate encoding of resolutions up to 1920x1080, providing excellent encoding of PC images combined with multi-media

Full HD real-time RTSP/RTP/UDP based streaming

Bandwidth optimization using multicast streaming to multiple receivers.

Low latency H.264 Baseline Profile 4.2 encoding up to 12Mbit/sec

Supports VESA resolutions up to 1920x1080

Auto-detection of resolution on DVI interface

10/100 Mbit/s Ethernet interface

Low power natural convection cooled appliance ensures high MTBF

Easy configuration and status review by means of an easy to use web interface

Desktop appliance
